# BOMBARDIER

## Overview

---

Bombardier is the world's largest manufacturer of both planes and trains, with a worldwide workforce of **70,900**<sup>(1)</sup> <sup>(2)</sup> people.

Bombardier is headquartered in Montréal, Canada. Our shares are traded on the Toronto Stock Exchange (BBD) and we are listed on the Dow Jones Sustainability World and North America indexes.

In the fiscal year ended December 31, 2015, we posted revenues of **18.2 billion USD**.

(1) As at December 31, 2015, including contractual and inactive employees. Subsequent to the end of the fiscal year, we decided to take steps to optimize our workforce with a combination of manpower reduction and strategic hiring. These figures do not reflect the planned changes.

(2) 3,950 product development engineering, Corporate office and other employees are not allocated to a reportable segment.

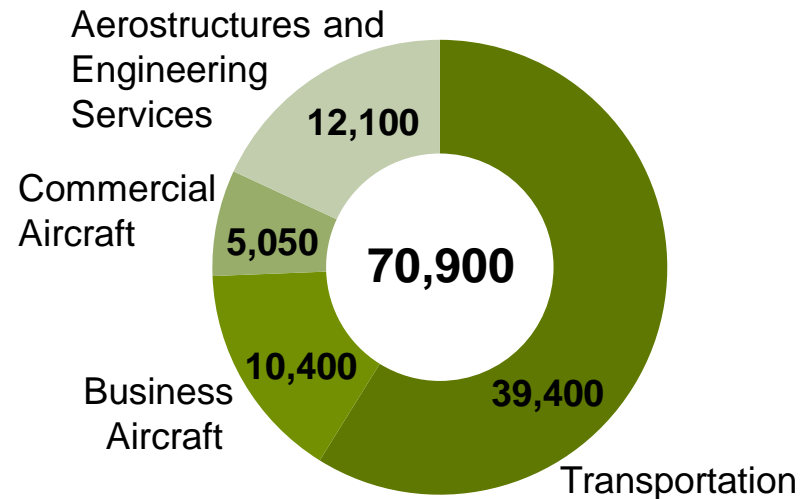

# BOMBARDIER

## A diversified company

### Breakdown by revenues<sup>(1)</sup>

### Breakdown by workforce<sup>(2) (3)</sup>

(1) For fiscal year ended December 31, 2015. Consolidated revenues \$ 18,2 billion.

(2) As at December 31, 2015, including contractual and inactive employees. Subsequent to the end of the fiscal year, we decided to take steps to optimize our workforce with a combination of manpower reduction and strategic hiring. These figures do not reflect the planned changes.

(3) 3,950 product development engineering, Corporate office and other employees are not allocated to a reportable segment.

# BOMBARDIER TRANSPORTATION

## A global player with a European base

---

Revenues 2015<sup>(1)</sup>: \$8.3 billion

Employees<sup>(2)</sup>: 39,400

🎯 Global Headquarters  
● Production Sites

# Bombardier Transportation is a global leader - we have secured strategic orders worldwide against key competitors

156 *FLEXITY* for Vienna  
& 24 years *FlexCare*  
\$480M (2015)

180 *AVENTRA* cars and 35  
years of maintenance for  
Transport for London,  
\$558M (2015)

15 CRH380D for  
China Railways  
\$381M (2015)<sup>1</sup>

30 years maintenance  
on *FLEXITY* for Toronto  
\$308 M (2015)

19 *Francilien* trains  
for STIF and SNCF  
\$141 M (2015)

80 high speed sleeper trains  
for China Railway Corp.  
\$165 M (2015)

*INTERFLO 450* signalling  
for V/HS lines of ADIF  
\$185 M (2015)<sup>3</sup>

Option for 47 *FLEXITY*LRVs  
for Berlin Transport Authority  
\$190 M (2015)

Option for 40 *FLEXITY*  
LRVs for Ghent & Antwerp  
\$107 M (2015)

62 *FLEXITY*LRVs for  
Rheinbahn AG (\$135 M)  
and KVB (\$ 68 M)  
(2015)

162 *MOVIA* metro cars  
for India's Delhi Metro  
\$228 M (2015)

*INNOVIA* APM for Chicago  
O'Hare International Airport  
\$180 M (2015)

62 *TRAXX* Locomotives  
for Israel Railways  
\$262 M (2015)

1,362 Double Deck trains  
for SNCF  
\$3.6 B (2015)<sup>2</sup>

1. Bombardier Sifang Transportation, a Chinese entity in which Bombardier holds a 50 % interest, has been awarded a contract with China Railway Corp. (CRC) to supply 15 CRH380D very high-speed trains valued at \$381 million
2. BT share valued at \$2.3 billion
3. BT share valued at \$86 million

## ALP-45 Dual-Power (NAFTA)

### Most important facts at a glance:

- 3 System AC application and diesel-electric propulsion
- 1-phase auxiliary and 1176kW Head end power (HEP)
- Very compact design due to limited space
- Optimized for high availability and reliability

### Traction converter 3360 DP V01

#### Technical information

**Units/vehicle:** 1 center unit, 4x1x2m  
**Type of modules:** 4.5 kV HVIM, water-cooled  
**Line voltages:** 12 kV 25 Hz, 25 kV 60 Hz, 12.5 kV 60Hz and/or DIESEL  
**DC links (quantity, voltage):** 2, 2.8 kV regulated. Can be separated into 2 links in case of failure  
**Tractive effort and max. speed:** 316 kN; 200km/h and Diesel up to 160km/h  
**Auxiliary/trains supply:** Integrated 1-phase auxiliary outputs 140kVA and 1176kW HEP 1-phase

### Drive 3700F

#### Technical information

**Units/vehicle:** 4  
**Technology:** Asynchronous Motor  
**Type of suspension:** Fully suspended TM 3700F V01 and GB 3700I V02 (ALP-46: 160km/h or ALP-46A: 200km/h)  
**Motor housing:** Thin sheet housing  
**Insulation Class:** H  
**Temp. Range:** -30 to 40°C

### TCMS (Safe and regular control)

#### Technical information

**TCMS:** Regular and Safe Control function in integrated system  
**UIC 556 5th edition:** Interoperability, Safe inauguration  
**Vehicle Communication:** Safe and regular communication WTB, ETH, MVB  
**Train to Wayside Communication:** Wi-Fi, 2G, 3G, 4G  
**Safe Data Visualization:** Safe Display areas  
**Homologation:** Homologated base functionality, Independent safe processing

# MITRAC Permanent Magnet Motor

## Advantages at a Glance

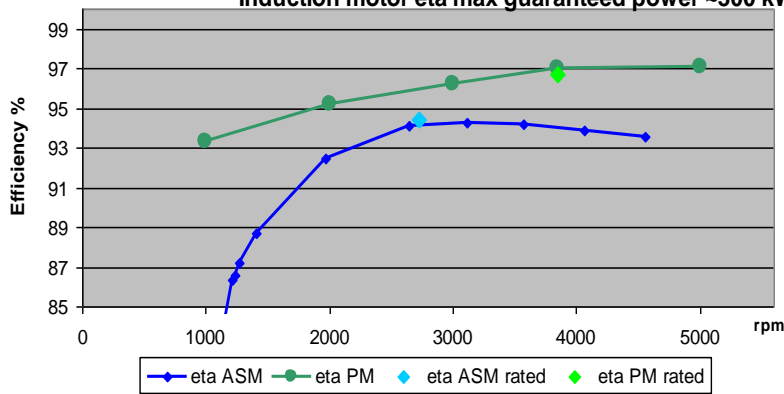

# MITRAC Permanent Magnet Motor

MITRAC TM1810PW permanent magnet motor  
for *TWINDEXX*

Lab test: PM-motor eta at max torque and rated power  
Induction motor eta max guaranteed power ~300 kW

## Characteristics

- Rotor must not be magnetised in service
- No rotor losses
- Better weight / torque relations compared to induction motors

## Advantages

- Compact motor design gives space in the bogie
- Higher efficiency: 2.6% better than induction motors

## Disadvantage

- 15 to 25% higher initial costs
- Single converter necessary (every motor needs a converter for control)
- Maintenance workshop has to be trained (slipping in a rotor => forces up to 1t)

# Agenda

---

- 1 INTRODUCTION TO BOMBARDIER TRANSPORTATION
- 2 ELECTRIC TRAINS – TYPICAL CONFIGURATIONS
- 3 POWER EQUIPMENT CONFIGURATIONS
- 4 APPLICATION OF POWER INVERTERS TO PROPULSION & DYNAMIC BRAKING
- 5 Q&A

# Power Equipment Configurations

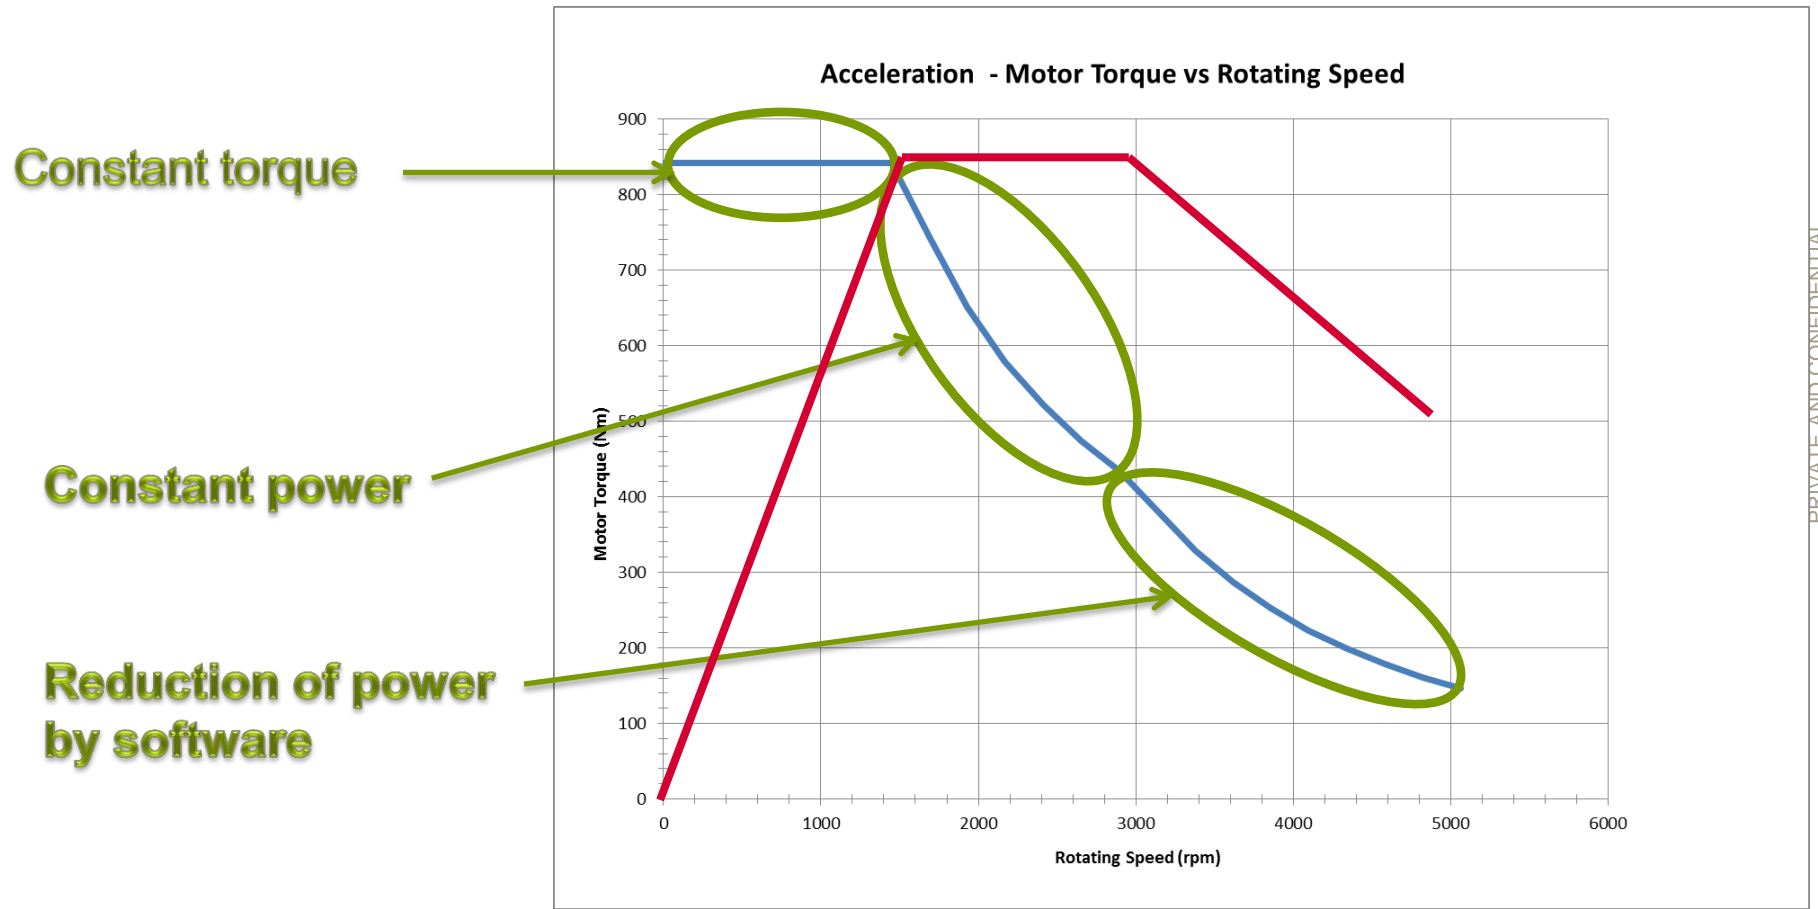

## Application of a VVVF inverter to an asynchronous traction motor

The switching of the VVVF inverter allows the use of the induction motor in propulsion or in dynamic braking.  
Mechanical rotation of the motor versus the frequency switching (rotating field) allows this control.

# Application of Power Inverters to Propulsion & Dynamic Braking

Typical traction torque curve of a propulsion system using a VVVF inverter combined with asynchronous traction motors
